

In **/editor/js/vendor/ckeditor/styles.js** I made the next change:

```
{
    name: 'Special Container',
    element: 'div',
    styles: {
/*          padding: '5px 10px', */
        padding: '4px 4px',
/*          background: '#eee', */
        background: '#EEFCFC',
        color: '#000',
        border: '1px solid #ccc'
    }
},
```

In Xerte the style of the “special container” is not changed.

And in the Source the script of the “special container” is still:

```
1 <div style="background:#eeeeee;border:1px solid
  #cccccc;color:#000000;padding:5px
  10px;">texttest&nbsp;texttest&nbsp;texttest&nbsp;
2 <br />
3 texttest&nbsp;texttest&nbsp;texttest&nbsp;
4 <br />
5 texttest&nbsp;texttest&nbsp;texttest&nbsp;
6 </div>
7
```
