

When the fill-in exercise is used, the line height is normal until the highlighted word is added. Then the line spacing increases and that costs too much screenspace and makes reading unpleasant.

How can that be solved?

Without the fill-in word:

Add interactive text. To mark the words for the exercise use the **left/right** mouse click and choose 'Mark Word' from the menu.

right

left

With the fill-in word:

Add interactive text. To mark the words for the exercise use the **left/right** mouse click and choose 'Mark Word' from the menu.
